ASEAN ATM Master Plan

ASEAN-wide implementation of agreed initiatives

Conclusions and Recommendations

Anders Hallgren
ARISE+ ATM Expert

Your safety is our mission.

An agency of the European Union 

CONCLUSIONS

Took note of the fact that the APAC region will soon have more traffic than Europe and North America together.

Recognised the challenges facing the region and took note of the request from ICAO to address ATM improvements in a collaborative manner.

Recognised the need to ensure the involvement and buy-in from senior management. Each Member State is encouraged to ensure that senior management signs off deployment plans.

CONCLUSIONS

Took note of the general principles driving ATM innovation in Europe and the significant collaborative effort that is required.

Welcomed the presentation from the ASEAN ATM Master Plan development team, and noted the need to avoid duplication of reporting requirements.

Recognized the need for more detailed explanations on what stakeholders need to do, and agreed that this would be considered in the process of developing the road maps for implementation.

CONCLUSIONS

Noted that the European ATM Master Plan is the roadmap driving the modernisation of the European ATM system.

Understood the planning process used when developing the EUR ATM Master Plan and the division of the plan into three different levels.

Noted the European ESSIP/LSSIP processes, and how reporting is divided in three different views, strategic, deployment and engineering views.

CONCLUSIONS

Noted the presentations from the lead countries on the status of developments in the five prioritised initiatives.

Discussed the way forward in developing the road maps required to ensure harmonised deployment of the initiatives.

Performed group activity to discuss and identify stakeholders and activities required for each initiative.

CONCLUSIONS

Recognised the need for further collaboration and the need to involve all ten member states in the development of the road maps.

Agreed that the development team will present to the ATTC a proposal for how this collaboration could be organised.

Recognised the need to have focal points from all ten countries for each of the initiatives and agreed to request the ATTC to ask for this nomination.

CONCLUSIONS

Development Team will prepare input to ATTC on a harmonised template on how to organise and monitor progress in implementation of the initiatives.
